THE TOKAMAK

Stars are natural Fusion Energy machines. The heat and light produced by stars comes from a fusion reaction in their core. Here on Earth, fusion energy machines called 'Tokamaks' recreate the power of the sun. Tokamaks heat up a plasma fuel to 150 million degrees C (10 x hotter than the core of the sun), this high temperature causes the atoms inside the plasma to fuse together and release energy.

When energy is released by the fusion reaction in a tokamak, it can be harnessed and converted into useful, low-carbon and sustainable electrical energy.

The Fusion Force cards are a fun way to learn about the science and engineering of fusion.

Head into a participating Fusion Force shop and collect a free card. There are 10 fusion characters to collect.

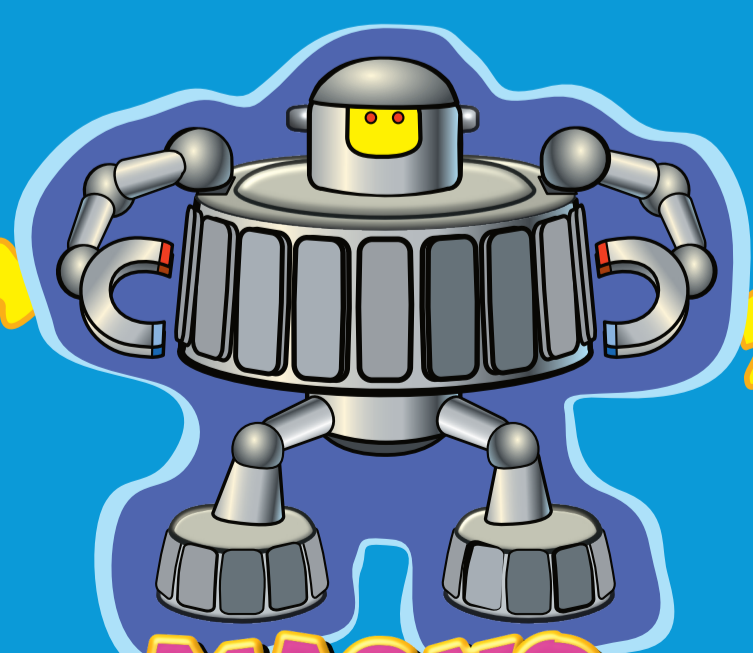

PROF FUSION
THE PHYSICS PROFESSOR

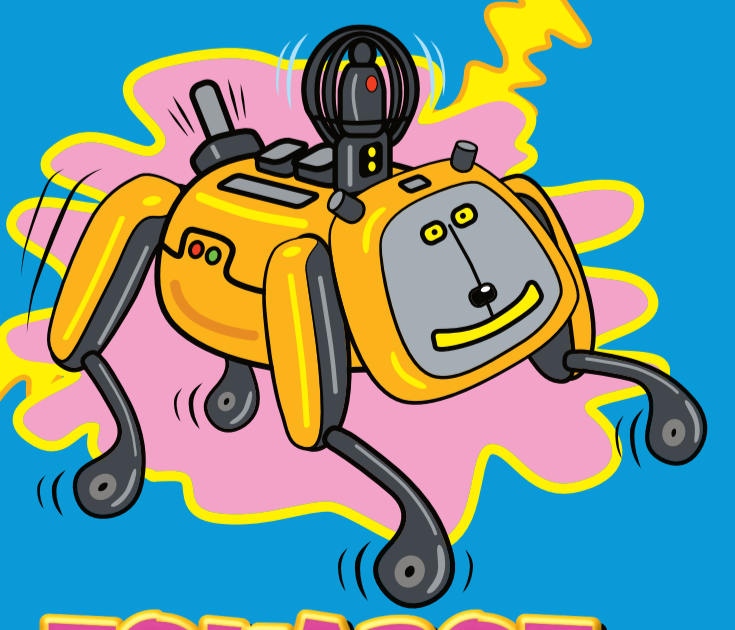

MULTIMAK
THE PROJECT MANAGER

TOKANEER
ENGINEER MASTERMIND

MAGNO
THE TOKAMAK MAGNET

TOKABOT
THE ROBOT DOG
